

Palomar Specialty Insurance Company

Palomar Specialty Insurance Company provides specialty property insurance solutions for personal and commercial customers. Headquartered in La Jolla, California, the company was founded in 2014 by a group of insurance veterans who recognized a need for customized options in the property catastrophe insurance market nationwide. By offering earthquake, hurricane and flood focused products through an exclusive network of agents, brokers, wholesalers and program administrators, Palomar Specialty ensures its policyholders receive specialized service for catastrophe protection.

Palomar Specialty is a growing insurance provider that is building an extraordinary business around an exceptional team of employees. As a result, Palomar Specialty is hiring at all levels of the organization and is seeking both experienced insurance professionals and recent college graduates who are up to the challenge of helping build a modern and differentiated insurance business. If you would thrive in a dynamic work environment where your contributions will be recognized and rewarded, Palomar Specialty would like to talk to you about joining this collaborative and hard-working team.

Palomar Specialty Insurance Company is an Equal Opportunity Employer.

Palomar Specialty is currently seeking to fill the following position in its beautiful La Jolla office:

Cloud Administrator Position Description:

Palomar Specialty is seeking a Cloud Administrator who will take ownership of Palomar Specialty's cloud environments as part of its IT Services group. This role will help build, monitor, automate, and troubleshoot cloud platforms. This position should help influence the roadmap, technology stack, and performance of cloud platforms. Other responsibilities would be to coordinate code deployments to the different platforms, general maintenance, and environment documentation, monitoring, and planning for upgrades to existing services or implementing new cloud services. They will also be responsible for compiling and reporting overall platform SLA metrics for all IT services within the cloud platforms.

Requirements:

- ◆ Requires a BS degree in Computer Science, Information Systems, Engineering or relevant experience of 5 years.
- ◆ At least 2 years of experience in a server or cloud administrator role
- ◆ Strong Active Directory skills
- ◆ Strong O365/ exchange email skills
- ◆ Windows / Linux server administration
- ◆ Experience architecting and designing cloud platforms and services
- ◆ Installation, configuration and maintenance of production systems
- ◆ Ability to rapidly learn and take advantage of new concepts and business models
- ◆ Working knowledge of Java platforms (Tomcat/WebSphere/WebLogic)
- ◆ Working knowledge of SQL server
- ◆ Strong communication and collaboration skills
- ◆ Insurance or Financial Services experience a plus
- ◆ Demonstrated ability to communicate in both verbal and written communication
- ◆ Strong problem solving, communication and analytical skills

Responsibilities include (but are not limited to):

- ◆ Responsible for virtual infrastructure systems, enterprise software, backup applications, and storage platforms
- ◆ Architect, design, build and maintain cloud environments within a collaborative design and development environment
- ◆ Support cloud servers and services, including security configurations, service integrations, monitoring, and troubleshooting
- ◆ Implement and support email, directory services, and identity and access management within a cloud environment
- ◆ Collect requirements and build solutions and tools to constantly improve availability and performance
- ◆ Design and implement next-generation automation solutions
- ◆ Review and audit of existing solutions and system architecture
- ◆ Optimize existing hosting partnerships and improve service delivery while reducing costs
- ◆ Serve as Tier 2 escalation point for end user troubleshooting
- ◆ Act as a liaison between development and support
- ◆ Support the security and audit teams regarding periodic audits and cybersecurity risk mitigation
- ◆ Support and facilitate change management, release management, and resource planning functions
- ◆ Support, communicate, reinforce and defend the mission, values, and culture of the organization
- ◆ Travel 15% of the time

Salary:

Competitive salary that is commensurate with individual experience.
